# STS: Ethical challenges to Science and Technology to shaping society

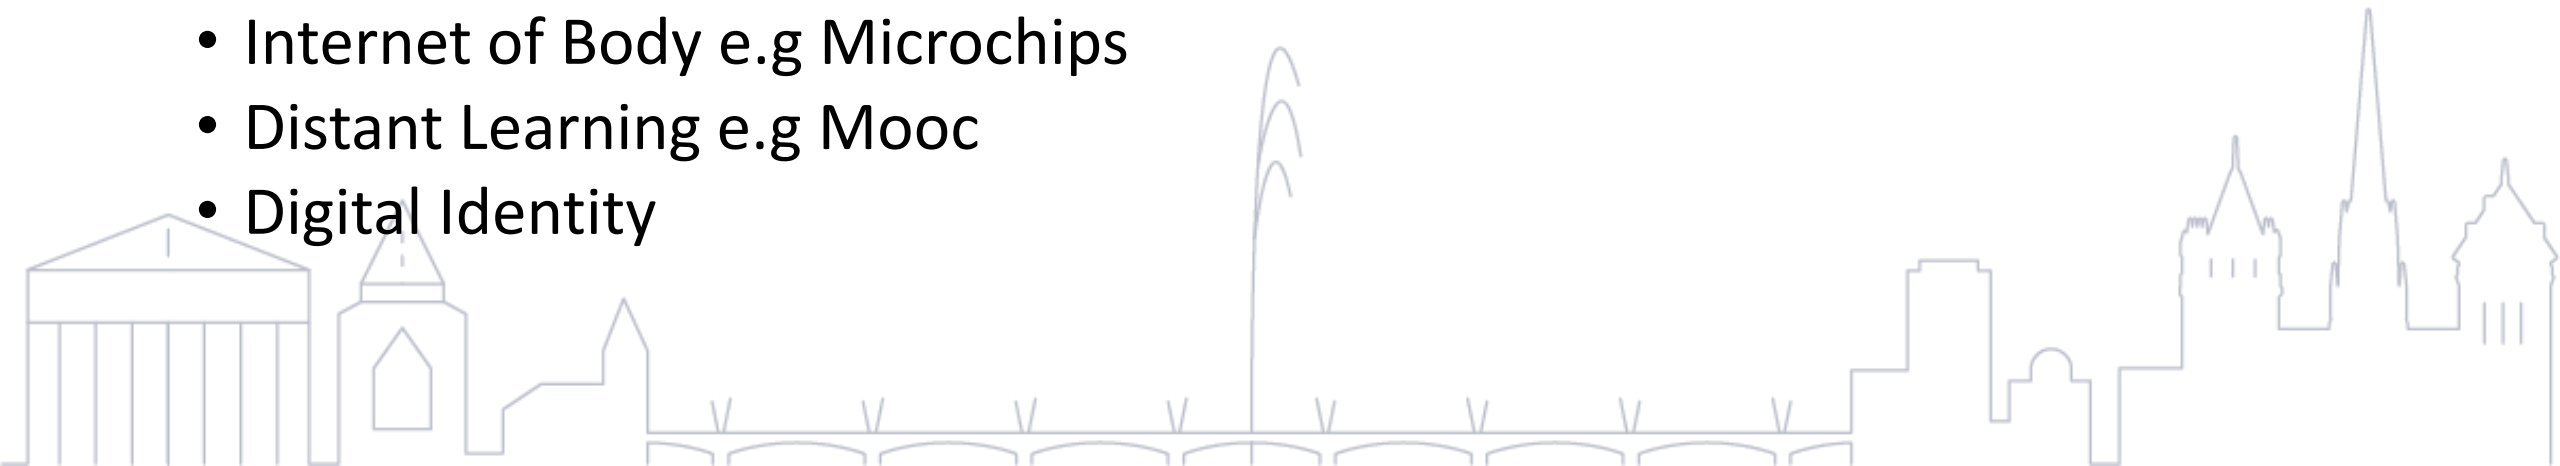

Values for Quality Education – Values for Living Together: Global Citizenship Education

Nadia Balgobin  
Senior Advisor Globethics.net

# The emerging Science and Technologies Areas

- ITC e.g Mobile
- AgroTech e.g GMO
- FinTech e.g Cryptocurrency
- BioTech e.g MRNA
- Internet of Things e.g Meters
- Internet of Body e.g Microchips
- Distant Learning e.g Mooc
- Digital Identity

# ITC e.g Mobile

- Have we improved communication or rather enabled more access?

# AgroTech e.g GMO, Artificial Meat

- Do we have better quality of foods in the market or instead more transformed products?

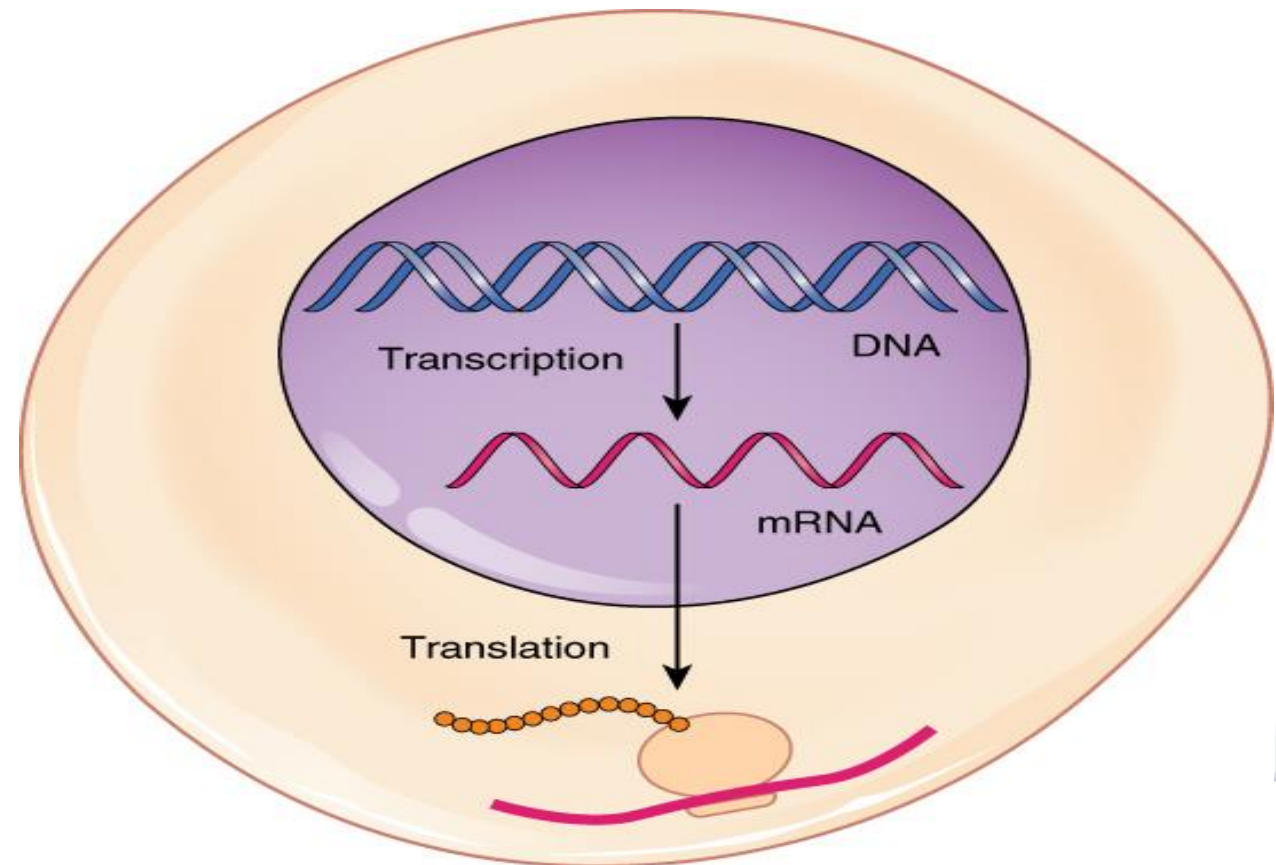

# FinTech e.g Cryptocurrency

Will Digital currency resolve really the financial conditions of the world?

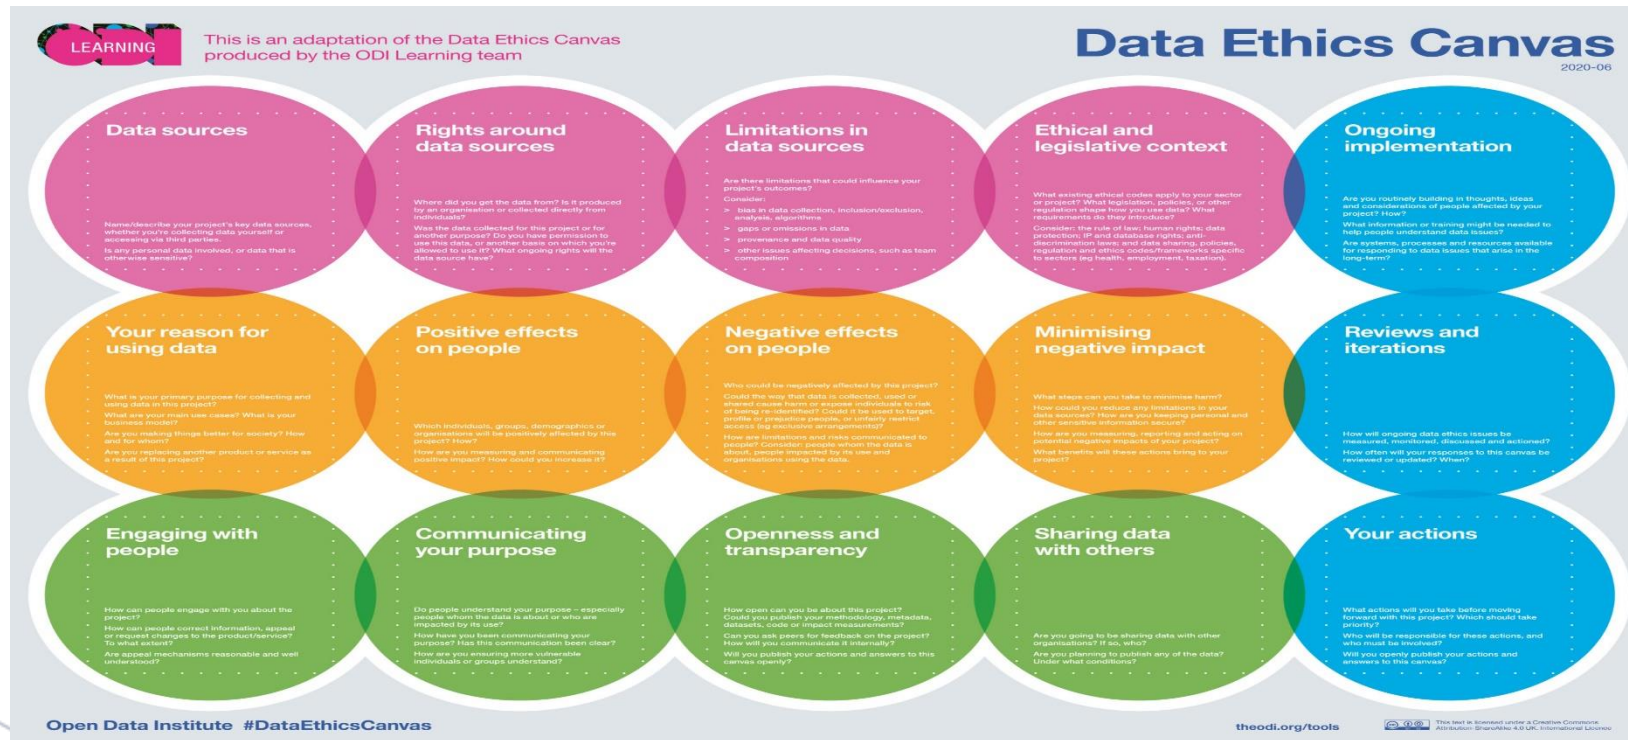

# BioTech e.g MRNA

- Are we intervening with the creation of God?

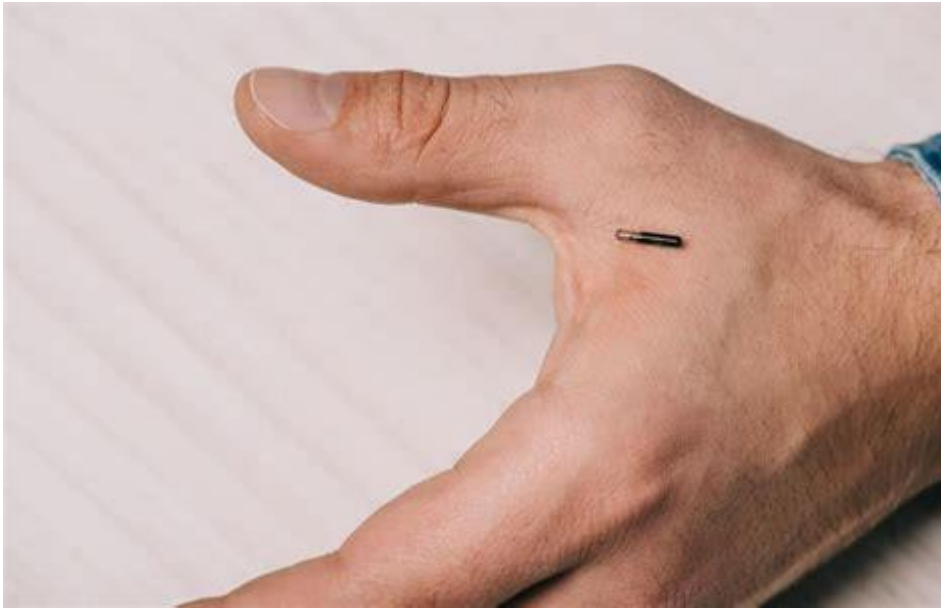

# Internet of Things e.g Meters

- Are we aware of those data and is there any ethical use of them?

# Internet of Body e.g Microchips

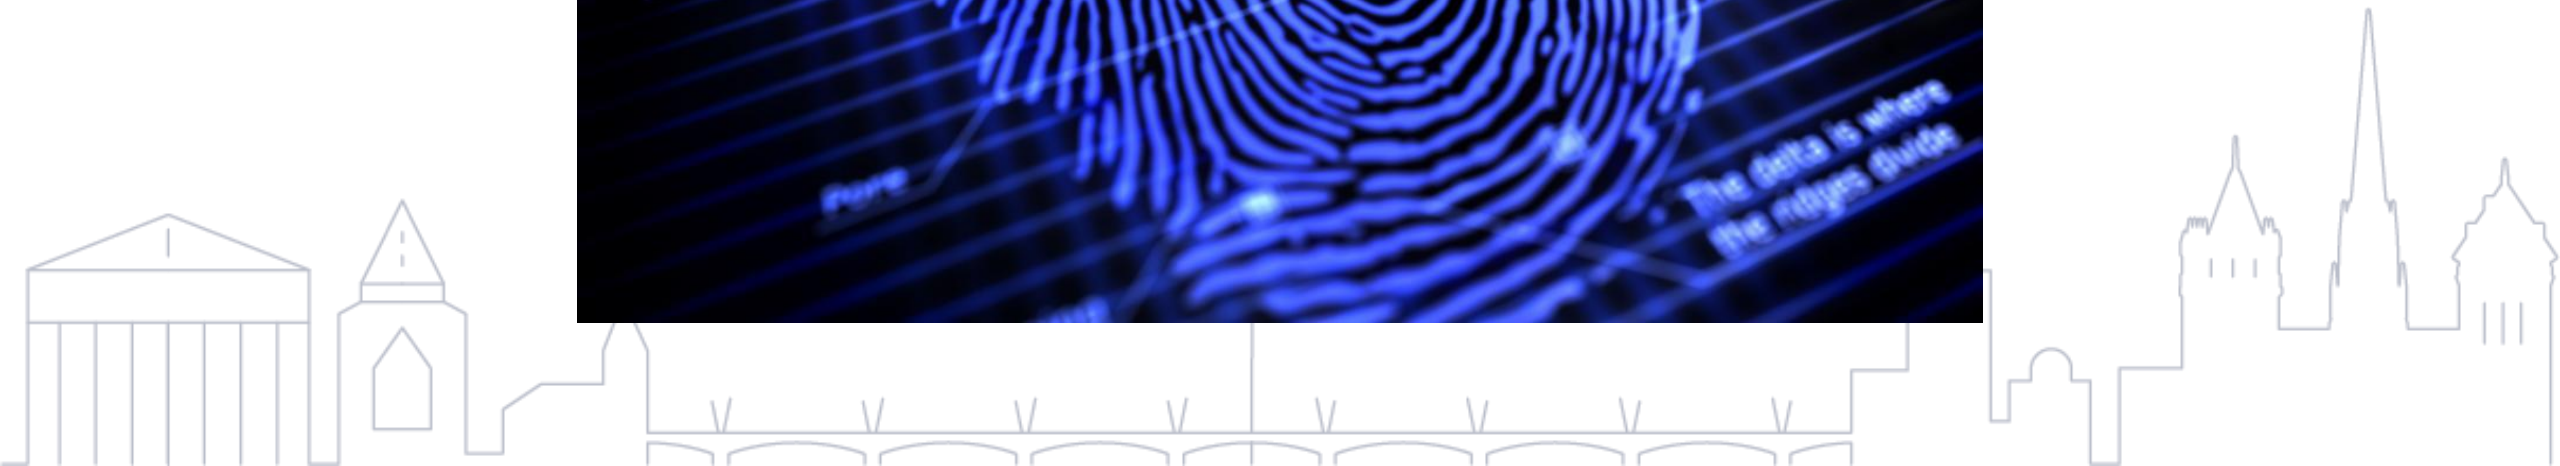

- Aren't we interfering with our natural god-given body?

# Digital Identity

- Are we really building a global identity system or a rather a tool of surveillance?

# Conclusion

- Aren't we building a dehumanized society?
- Are we paying attention enough to the values we want to embed in society to avoid this global deconstruction of our societies?
